

What are Complementary Onsens?

When bathing in *onsens* with complementary spring qualities in a specific sequence, you can magnify their healing benefits. This extravagant journey enhances the combined effects, as if 1 + 1 equals 3 or even 4.

 1st Bath: Myoban Yunosato (acidic sulfur spring)

 2nd Bath: Hyotan Onsen (sodium chloride spring)

Start your journey at Myoban Yunosato to soak and cleanse, then finish at Hyotan Onsen to rinse and moisturize, all in the same day. You can expect stunning results from this experience.

The sight of steam rising above Myoban and Kannawa has been designated as one of Japan's Nationally Important Cultural Landscapes.

Beppu's rising steam is also listed among Japan's Sceneries to Preserve for the 21st Century, ranking second only to Mount Fuji in popularity. *Onsens* are a valuable underground resource that not only enhances the landscape but also offers various benefits, such as *Yunohana* salts and *jigoku* steam cuisine. While experiencing a single *onsen* is essential during your visit to Beppu, why not indulge in a pair for even greater healing benefits?

Visit complementary *onsens* to get Beppu presents.

Bath at Myoban Yunosato then Hyotan Onsen on the same day, and get their stamps for the following presents:

Presents

Yunohana Mini Soap

Beppu Original Bamboo Bell

RECOMMENDED ITINERARY

Visit the *Yunohana* huts

Myoban Area

Yunohana salts are harvested using a traditional method from the Edo period. This method has been designated as one of Japan's National Intangible Folk Culture Assets.

Enjoy complementary *onsens*

Myoban Area Kannawa Area

1st Bath: Myoban Yunosato

2nd Bath: Hyotan Onsen

Enjoy *Jigoku* steam cuisine

Kannawa Area

Jigoku steam cuisine utilizes high-temperature *onsen* steam to cook ingredients, concentrating the *onsen* minerals into the flavors of the food for an exquisite taste.

1st Bath
in Myoban

Myoban Yunosato

Soaking Bath with Excellent Cleansing Effect

The acidic sulfur spring at Myoban Yunosato purifies the skin and effectively removes oil, dirt, and dead cells. Its milky white water also provides antibacterial and toning benefits, making it a luxurious beauty treatment.

The open-air baths at Myoban Yunosato treat you to breathtaking views, while the private baths, tucked beneath straw-thatched roofs, offer a more secluded experience. The area also includes a restaurant, a *Jigoku* steam food kiosk, and souvenir shops where you can purchase Japanese crafts, *Yunohana* salts and cosmetics to recreate the *onsen* experience at home.

Free for Age 0–3
Private bath:
¥2,000 – ¥2,500

*As of 01/01/2025; fees are subject to change.

2nd Bath
in Kannawa

Hyotan Onsen

Rinsing Bath with Excellent Moisturizing Effect

Hyotan Onsen is a rare gem even among Japanese hot springs. Its gentle acidity aligns with the skin's natural pH, and its metasilicic acid content—an impressive 456 mg per kilogram of water—greatly exceeds the average level of this powerful moisturizer found in *onsens*. After a soak, you'll enjoy soft, hydrated skin with a lasting glow.

This *onsen* has consistently earned the prestigious Michelin 3-star rating. The public baths resemble a theme park, featuring various indoor and outdoor pools, waterfall baths, steam saunas, and sand baths. The private *onsens* provide a stylish escape. Additionally, you can enjoy drinkable spring water, *onsen* steam inhalation, and *Jigoku* steam cooking for a truly well-rounded experience.
